

## What is entity and column?

 Fundamental elements of database design

### What is entity and column?

- Fundamental elements of database design
- Define how data are being **stored**

### What is entity and column?

- Fundamental elements of database design
- Define how data are being stored
  - E.g. Everything put together? Separate places for different data?

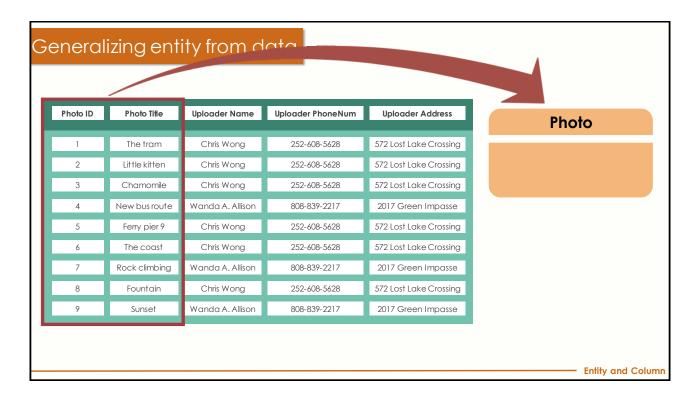

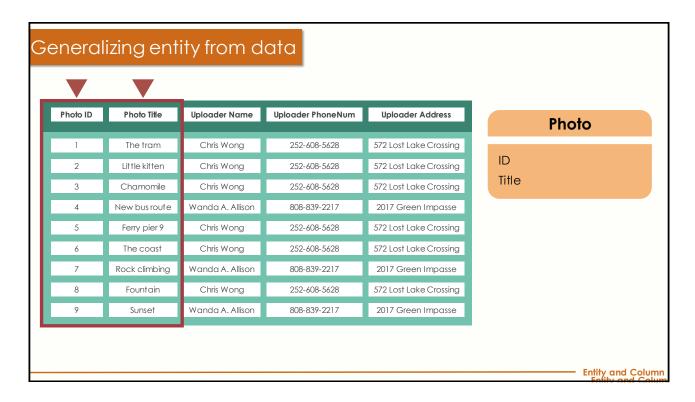

### What is entity and column?

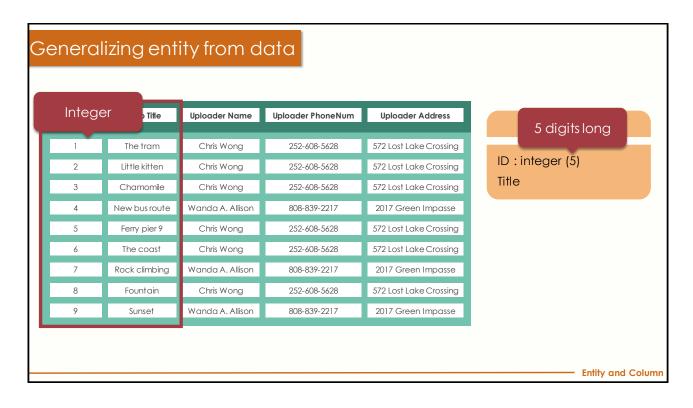

- Fundamental elements of database design
- Define how data are being stored
  - E.g. Everything put together? Separate places for different data?
- Generalized form of data

### What is ERD?

A graph of entities and their relationships

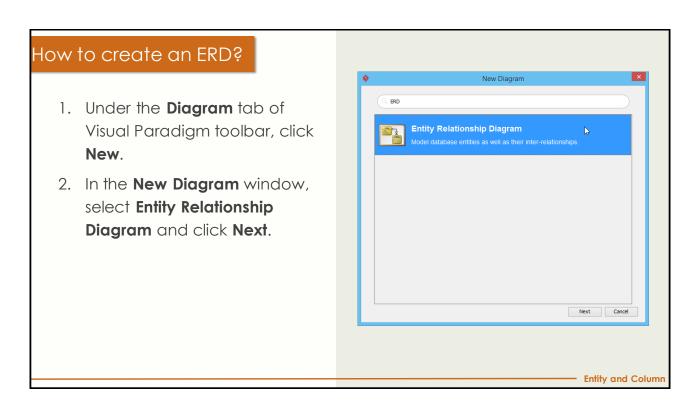

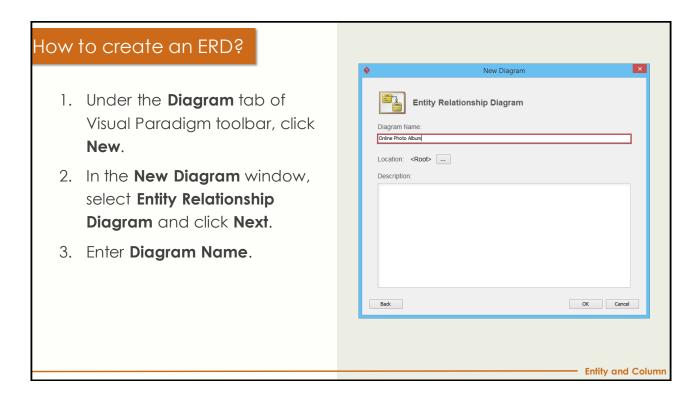

### What is ERD?

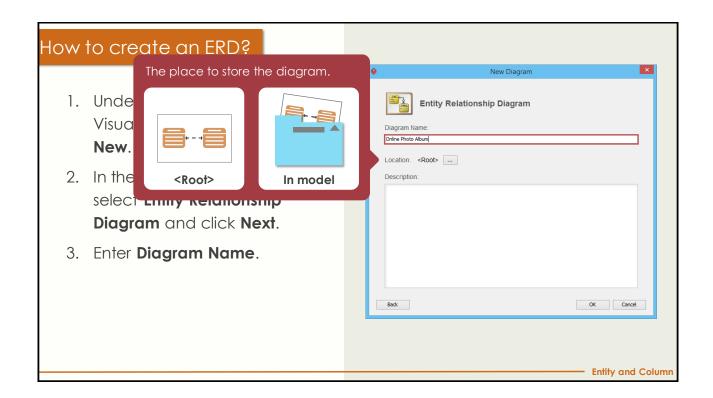

- A graph of entities and their relationships
- Multiple ERDs for different contexts

#### How to create an ERD? Project Tools Diagram View Team Modeling → Undo F Fo 1. Under the **Diagram** tab of C Redo **∜** Fc Visual Paradigm toolbar, click New UeXceler Сору Paste New. **Paradigm** Visual Enterprise Edition **Open Recent Projects UeXce** A system developr **UeXceler** not just **UML Modeling** ◆ Ope

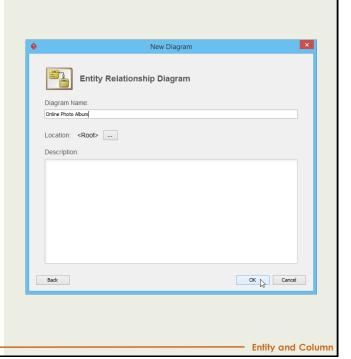

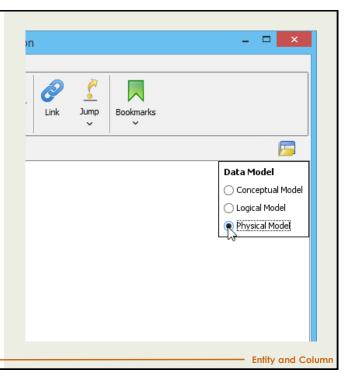

### How to create an ERD?

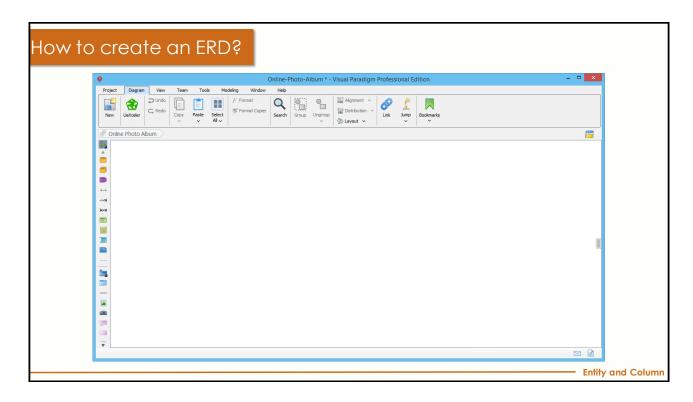

- Under the **Diagram** tab of Visual Paradigm toolbar, click **New**.
- In the New Diagram window, select Entity Relationship Diagram and click Next.
- 3. Enter **Diagram Name**.
- 4. Click OK.

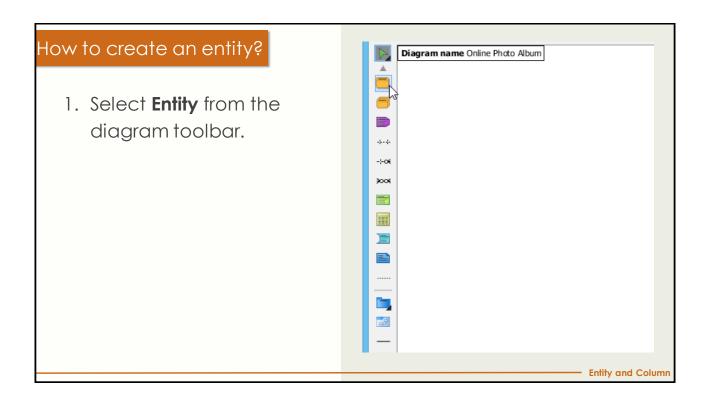

### How to create an ERD?

- Under the **Diagram** tab of Visual Paradigm toolbar, click **New**.
- In the New Diagram window, select Entity Relationship Diagram and click Next.
- 3. Enter **Diagram Name**.
- 4. Click OK.
- 5. Select the type of data model.

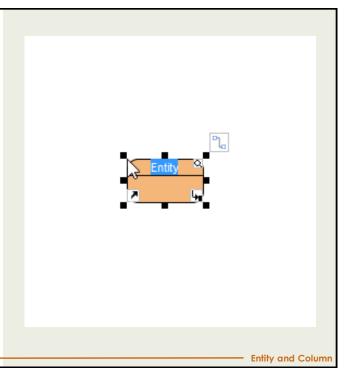

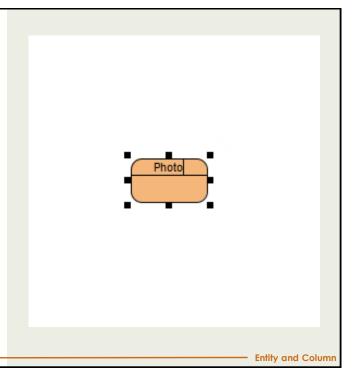

### How to create an entity?

- Select **Entity** from the diagram toolbar.
- 2. Click on the diagram to create an entity.

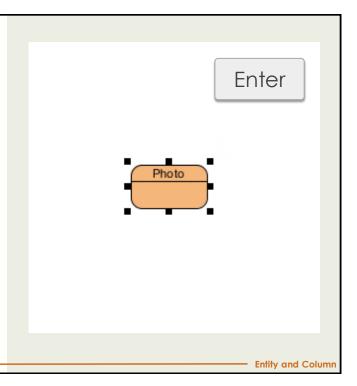

### How to create an entity?

- Select **Entity** from the diagram toolbar.
- 2. Click on the diagram to create an entity.
- 3. Enter the name of the entity.

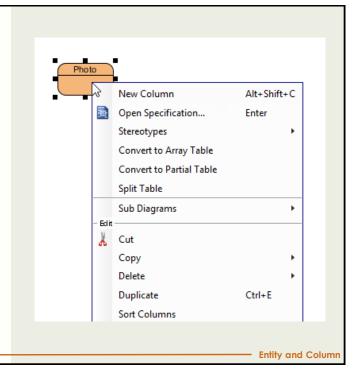

### How to create an entity?

- Select **Entity** from the diagram toolbar.
- 2. Click on the diagram to create an entity.
- 3. Enter the name of the entity.
- 4. Press **Enter** to confirm editing.

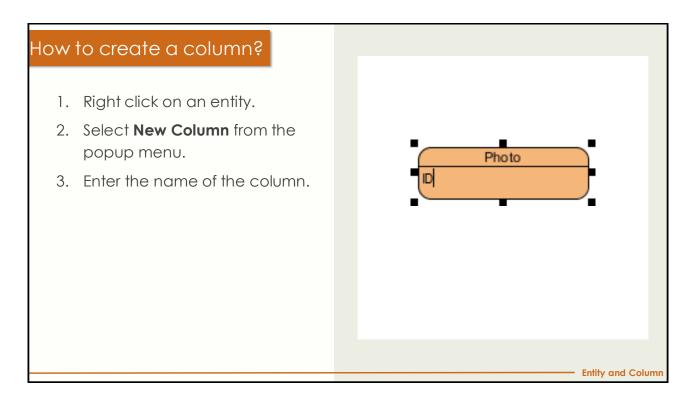

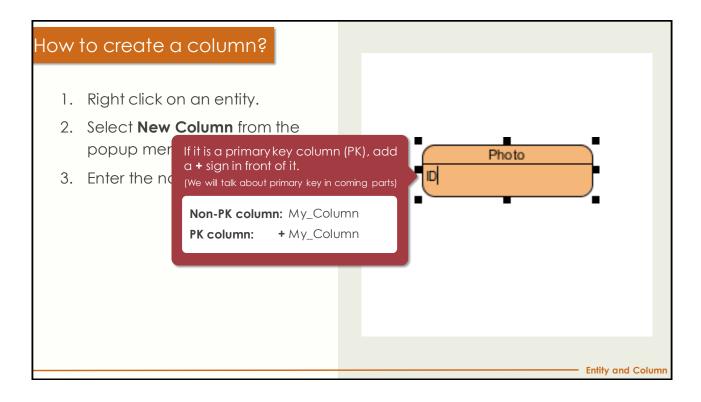

### How to create a column?

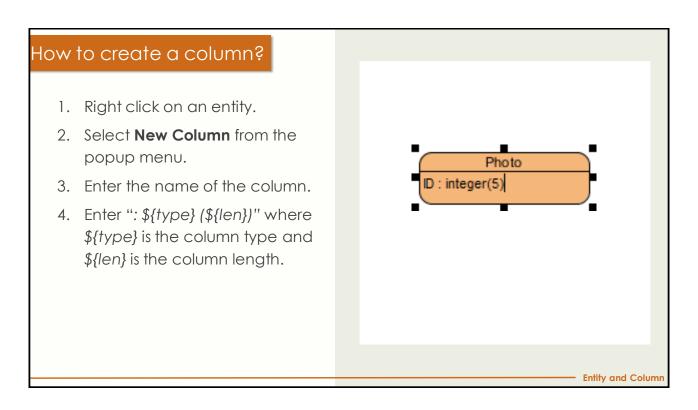

1. Right click on an entity.

#### How to create a column? 1. Right click on an entity. New Column Alt+Shift+C 2. Select New Column from the Open Specification... Enter Stereotypes popup menu. Convert to Array Table Convert to Partial Table Split Table Sub Diagrams Edit **Shortcut:** Shift Alt SOIL COIUMINS

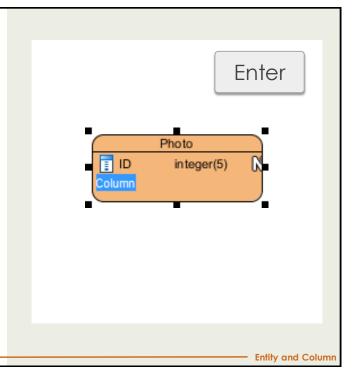

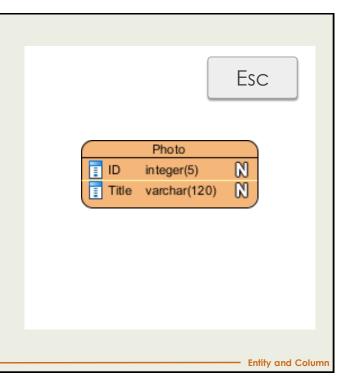

#### How to create a column?

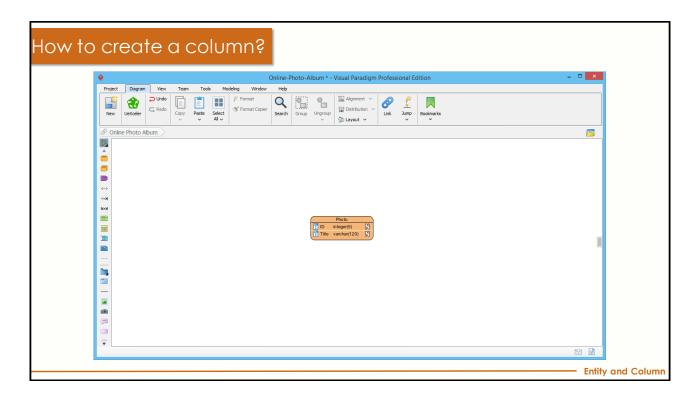

- 1. Right click on an entity.
- Select New Column from the popup menu.
- 3. Enter the name of the column.
- 4. Enter ": \${type} (\${len})" where \${type} is the column type and \${len} is the column length.
- 5. Press **Enter** to confirm creation and move on to creating the other column(s).

### How to create a column?

- 1. Right click on an entity.
- 2. Select **New Column** from the popup menu.
- 3. Enter the name of the column.
- 4. Enter ": \${type} (\${len})" where \${type} is the column type and \${len} is the column length.
- 5. Press **Enter** to confirm creation and move on to creating the other column(s).
- 6. Press **Esc** when finished.
